

CUT

your AC bills upto

35%!

The World's First & only Programmable

**AC saver to guaranteed savings WITHOUT increasing
your room temperature, with a PAYBACK of 2 - 7 months only!!!**

- Displays Room & Coil temperature, programmable by you.
- Automatically adapts AC to changes in ambient temperature & climates.
- Easy One-Time Programming for 9 - Pt programmable menu.
- Attractive futuristic Polycarbonate, Non-Flammable cabinet with Remote for Temperature Setting.
- Easy to instal, 370 gms, 15Cm x6Cm x 4.4Cm.
- The Airtron offers all the controls of a " Precision AC" to maintain Set Temp accurately including 'Fuzzy logic' function & substantially 'increases' life of your compressor!
- APPLICABLE on ALL AC's upto 20.0 TR, Windows, Splits , Ductables, Cassettes, Multi-Splits , etc
- SAVES equally on Inverters & 5 -Star/1-Star AC's as well!

AIRTRON

KONTACT Engineers
Renewable, Green & Beyond

"SAVE ELECTRICITY AND REDUCE GREENHOUSE GASES"

HOW IT WORKS:

1a. AC's are only controlled by a Mechanical Relay & Timer - thus, have no "Intelligence".

Soln.: The Airtron is an 'intelligent' microprocessor which operates on multiple algorithms in a 'closed - loop' circuit based on feedback from its 2 additional sensors, for Room Temperature & Coil Temperature. This also enables the Airtron to adapt to changes in ambient condition automatically & Save electricity.

2a. The AC manufacturer pre-sets the AC for the hottest geographical locations.

Soln.: The MAS allows you to program the AC to your climate & geographical locations & automatically adjusts itself to change the ambient conditions to save electricity.

3a. Conventional Ac's do not have a Room temp. sensor or a Coil temp. sensor - and operate only on the Return Air temp. which shows error upto +/- 4C.

Soln.: The MAS has two additional sensors - 1 for the Room & 1 for the Coil - and its multiple algorithms ensure the Room Temp is maintained while compressor run - time is substantially reduced to guarantee savings irrespective of geographical location, climate, change of seasons, day or night and yet maintain the Set Room Temperature.

CE certified & 80% Depreciation under I.T. rules ensures pay back is reduced by 33%!
Approved by leading PSU's, MNC's in India & Overseas.
